I Dimp's Humphrey

Property owner at 3221 Fillmore St.
for 50 years. have gotten our soil
tested or have gotten a letter with
results, stating that my yard does
not require an immediate cleanup.
according to the Decision Value sheet,
my Arsenic level results is higher at
153.1 exceeding 128 parts per million.

Alternative 4

EPA have my permission to remove the
top 12 inches of soil from my yard
where arsenic level exceed 128 parts per
million. The soil will be transported off
to the site for disposal at an appropriate
facility, back fill with clean soil and
yard features restore. I would like
Sprinkling system put in at my expense.

My wife have a heath problem(Illness)
that none of the Doctors or Specialists
have been able to find out what is wrong
with her, for many years. Do you think
the cleaning of the soil will correct
her problem?

(over)

My next question is, will EPA
be willing to pay for some place, for
my wife and I to stay while the cleanup
is being done, so we do not have to
breathe contaminated dust?

Dinifer Humphrey
